

STRAIGHT WIRE

SOUNDSTAGE

SPEAKER CABLE

OFHC Copper Conductors
For accurate, uncolored presentation

Polypropylene Insulation
Delivers All for the Power and Signal

Helix Design
Produces authentic soundstage

SOUNDSTAGE speaker cable combines high quality materials and design at a competitive price. Providing tight bass and focused upper registers in a compact design, **SOUNDSTAGE** delivers signal and power with ease for systems enthusiasts that demand accurate presentations with delicate details clearly apparent.

SOUNDSTAGE features eight OFHC copper conductors sheathed in a low dielectric Polypropylene, helically twisted to minimize distortions and covered in a soft TPR durable jacket that minimizes mechanical noise and vibrations. The cable can be run as a two conductor 12 gauge format or as a four-conductor internal bi-wire format to meet the requirements of many home theater and audiophile speakers.

LEVEL 2 - ENHANCED

SIGNIFICANT ADVANCEMENT BEYOND STANDARD CABLES
